

# RAJA SALMAN AHMED KHAN

Full Stack Web Developer | AI & Machine Learning Engineer | Data Science Student

Lahore, Pakistan | rajasulman106@gmail.com | 0320-4813868 | linkedin.com/in/raja-sulman-ahmed-khan-65b49a339

## PROFESSIONAL SUMMARY

Artificial Intelligence and Data Science student (5th Semester, BS Data Science) with practical, project-based experience across full stack web development, machine learning, deep learning, computer vision, and natural language processing. Currently working as an AI Engineer / Developer (Remote, Paid, 8+ Months) at KairoSys (Pvt.) Ltd, a German company, on an industrial multi-agent sales intelligence platform for German-market clients, where multiple SaaS software solutions and AI systems/applications have been designed, alongside independently designing and delivering multiple production-style websites and AI systems. Combines strong system design and architecture thinking with hands-on Python, ML/DL, and ERP-oriented development to build end-to-end, real-world solutions.

## PROFESSIONAL EXPERIENCE

### AI Engineer / Developer — KairoSys (Pvt.) Ltd

8+ Months (Remote, Paid)

*Remote, Paid Role — Multi-Agent Lead Generation & Sales Intelligence Platform for German Clients*

- Building and contributing to an industrial-grade multi-agent system for automated lead scoring, enrichment, and outreach generation, built on a hybrid rules + LLM pipeline.
- Working across the data pipeline: live data ingestion (Google Maps scraping), NLP-based signal extraction, rule-based ICP scoring, and LLM-driven lead qualification and outreach copy generation.
- Contributing to backend architecture using FastAPI, PostgreSQL/SQLAlchemy (async), and agent orchestration modules for lead intelligence, scoring, and email automation.
- Gaining hands-on experience with system design for scalable multi-agent architectures, database modeling, and production-readiness planning (Docker, Alembic migrations, API design).
- Designed and contributed to multiple SaaS-based software solutions and AI systems as part of the platform, built for a German company and targeted at German-market clients.
- Designed multiple AI applications within the platform, including lead scoring, enrichment, and outreach-generation modules powered by LLM and rule-based pipelines.

### Data Entry Operator — Ghaffar Honda Center

6 Months

*Ghaffar Honda Center, Lahore — Bike Sales & Inventory Data*

- Maintained and updated bike inventory records — models, engine and chassis numbers, colours, and stock status — in the dealership's records system with a high level of accuracy.
- Entered and verified customer, sales, and booking data for motorcycle purchases, ensuring every record was complete and free of errors.
- Handled multiple data entry tasks in parallel, including daily sales logs, invoice and receipt records, and stock reconciliation, while consistently meeting daily deadlines.
- Prepared and maintained records in MS Excel and produced basic sales and inventory summaries for management review.
- Cross-checked physical documents against digital entries to remove duplicate records and correct discrepancies.

## TECHNICAL PROJECTS

### Full Stack Website Design, System & Architecture Design

- **Al-Hadi Institute (ERP System):** Designed and developed a full stack ERP-based website for an educational institute, covering UI/UX, front-end build, and back-end structure, with all-in-one management of admissions, student records, staff, attendance, fees, and course/class scheduling from a single system.
- **Puretress Hair Oil:** Built a full stack business/e-commerce website, including product presentation, site architecture, and responsive design.
- **Deenly Tutor:** Designed a full stack tutoring platform website with structured system architecture and ERP-oriented data organization for managing tutors, students, and sessions.
- **Clinic Management System (Clinic & Hospital SaaS Platform):** Designed a multi-tenant SaaS-style platform architecture for clinics and hospitals, covering system design, data modeling, and ERP-style workflow structuring, with all-in-one management of patients, appointments, doctors/staff, billing, and medical records from a single dashboard.

Machine Learning Projects

- **Car Price Prediction:** Built a regression-based model to predict used car prices from historical listing data.
- **Email Spam Detection:** Developed a text classification model to detect spam emails using NLP preprocessing and ML classifiers.
- **House Price Prediction:** Built a regression model to estimate house prices based on property features and location data.
- **Breast Cancer Prediction:** Developed a classification model to predict breast cancer diagnosis from medical diagnostic features.
- **Movie Recommendation System:** Built a content/collaborative-filtering based system to recommend movies based on user preferences.

Deep Learning, Computer Vision & NLP Projects

- **Car Price Prediction (Neural Network):** Built a deep learning (neural network) model to predict car prices, comparing performance against traditional ML approaches.
- **Sports Celebrity Prediction:** Developed a computer vision model to classify and predict sports celebrities from images.
- **AI HR Resume Screening System:** Built an NLP-based system to automatically screen and rank resumes against job requirements.
- **AI Mental Therapist Chatbot:** Developed a conversational AI chatbot designed to provide supportive, therapy-style conversations.
- **Medical Chatbot:** Built an AI chatbot to answer medical/health-related queries using NLP techniques.

EDUCATION

---

**Bachelor of Science in Data Science (Artificial Intelligence)**  
*Superior University, Lahore*

**In Progress — 5th Semester**

- Specializing in Artificial Intelligence; coursework includes machine learning, data analysis, and intelligent systems.
- Applying data-driven thinking to real-world problem-solving through coursework and independent practice.

**Intermediate (FSc Pre-Engineering)**  
*Punjab College, Lahore*

**Completed**

- Studied core sciences including Mathematics, Physics, and Chemistry.

**Matriculation (Science)**  
*Qazi Grammar Boys High School, Lahore*

**Completed**

- Completed secondary education with a focus on science subjects.

CORE SKILLS & COMPETENCIES

---

- **Web Development:** Full Stack Website Design, System Design, Software Architecture Design, ERP System Design
- **Machine Learning:** Regression, Classification, Recommendation Systems, Scikit-learn
- **Deep Learning & AI:** Neural Networks, Computer Vision, Natural Language Processing (NLP)
- **AI Applications:** Chatbot Development, Resume Screening Systems, Conversational AI
- **Programming & Tools:** Python, MS Excel, MS Word
- **Data Handling:** Data Entry, Record Management, Inventory & Sales Data, Data Accuracy & Verification
- **Communication:** Advanced interpersonal skills, professional English & Urdu
- **Soft Skills:** Time management, multitasking, problem-solving, adaptability
- **Languages:** English (Professional), Urdu (Native)
